

Be a Nurse ANESTHETIST

What is a CRNA?

Certified Registered Nurse Anesthetists provide anesthetics to patients in every practice setting, and for every type of surgery or procedure in which anesthesia is delivered. They are the sole anesthesia providers in nearly all rural hospitals.

Benefits

- High earning potential
- Everyday is unique
- Variety of work settings
- CRNA's are always needed

Education

- A bachelors or graduate degree in nursing or other appropriate major
- A license as a Registered Professional Nurse and/or Advanced Practice Registered Nurse (APRN) in the US
- A minimum of one year of full-time ICU experience
- Graduation from a nurse anesthesia educational program
