

What are Core Modules?

Core Modules are a specialized type of Class A credit designed to help keep you up-to-date on the latest innovations and current evidence-based knowledge relative to anesthesia practice. They are created using recently emerging content published in the last five-year period, and address the four core domains of nurse anesthesia practice; Airway Management, Applied Clinical Pharmacology, Human Physiology and Pathophysiology and Anesthesia Equipment and Technology. During your second 4-year cycle, and each cycle thereafter, you will complete a total of four Core Modules, one from each domain.

Airway Management

Applied Clinical Pharmacology

Human Physiology and Pathophysiology

Anesthesia Equipment and Technology

DID YOU KNOW?

1. Core Modules ALSO count as Class A credits.

Use Core Modules to help fulfill both requirements.

2. You can also use any excess Class A credits over the required 60 during your 4-year cycle to fulfill the Class B requirement.

For more info on Class A credits visit: www.nbcrna.com/ClassACredits.

The NBCRNA does not produce Core Modules. List as of October 2020.

Find the list of Core Module providers here, www.nbcrna.com/CoreModules.
